*adjusted air pressure*

## Infinite Possibilities

### Designed To Accommodate Changes.

The Crossover™ can be used for everyday walking and with simple additions /adjustments - transforms into a knee that can be used for low and high activity sports.

### Take A Walk On The Wild Side.

Walking knees are good for walking only and sport knees are not good for walking. That's a big problem for the user with real life transitions from one activity to the next. Crossover™ bridges that gap, the world's first hybrid knee that delivers high performance in all activities.

### Adapts To You. No Tools Required

You will be amazed at what you can do with this knee! The Crossover™ allows you to make adjustments on the spot with no tools. Shred the hill and then walk to the lodge! The Crossover™ Hybrid Knee has got all daily aspects of your life covered.

### ALL-WEATHER PROOF!

Dirt, Water, Snow, the Crossover™ will continue to perform regardless of what Mother Nature throws at it. You never have to worry about losing functionality from a dead battery or an overheated microprocessor.

**DON'T LET LIFE**
